Three types of cases may thus be distinguished for selection: Key cases. Outlier cases. Local knowledge cases. Whatever the frame of reference for the choice of the subject of the case study (key, outlier, local knowledge), there is a distinction to be made between the subject and the object of the case study.

## **Case study - Wikipedia**

Cases are more or less representative of some broader phenomenon and, on that score, may be considered better or worse subjects for intensive analysis. The article then draws attention to two ambiguities in case-selection strategies in case-study research. The first concerns the admixture of several case-selection strategies.

Choosing Cases. Once we have a hypothesis to explore or test, and once we have settled on a general research design, then we need to choose specific cases to analyze. Case selection is important whether we are conducting a case study of a single civil war, an experiment involving a few dozen college students, or a statistical comparison of hundreds of elections.
