scale) and an exponential function from an ODE approxima-

Cooling Coffee Without Solv- ing Differential Equations

The Cooling of Coffee Project (Keng-Cheng, 2009, 36-37). The cooling of coffee project was chosen because the starting point of this problem was considered 'experientially real' for pre-service teachers. The whole project took four weeks to complete. Pre-service teachers worked in small groups of four people to carry out
