by Tim McQuade. The Mikuni BS32SS was a 32-millimeter, constant-velocity carburetor. A CV carburetor creates a more fluid air flow travel than some other carburetor types, which results in maintaining proper mixture levels and better engine performance. Because of its efficient design, the BS32SS carburetor was used in the 1980s in a variety of vehicles and motorcycle brands, such as Suzuki and Yamaha.

Mikuni Motorcycle Carburetor Theory 101. Motorcycle carburetors look very complex, but with a little theory, you can tune your bike for maximum performance. All carburetors work under the basic principle of atmospheric pressure. Atmospheric pressure is a powerful force which exerts pressure on everything.

Yesterday I received a set of Mikuni BS34 carbs for spare parts for my '82 KZ750R. Upon disassembly I found that the plugs covering the tubes where the pilot jets are located (for the lack of a better description) are missing. Pilot and main jets are the original sizes (37.5 and 110). Is there any point in such a 'modification'?
