On the Moon is a 2004 album by jazz pianist, singer, and composer Peter Cincotti. It was released on the Concord label and produced by Phil Ramone.

On the Moon - Wikipedia

Neil Armstrong and Edwin "Buzz" Aldrin were the first of 12 human beings who walked on the Moon. Four of America's moonwalkers are still alive: Aldrin (Apollo 11), David Scott (Apollo 15), Charles Duke (Apollo 16) and Harrison Schmitt (Apollo 17). In all, 24 American astronauts made the trip from the Earth to the Moon between 1968 and 1972.

Who has Walked on the Moon? - NASA Solar System Exploration

With apologies to Pink Floyd, there is no permanent dark side of the moon. There is, however, one side of the moon that never faces Earth head-on. The moon completes a full, 360-degree orbit around our planet every 27.32 days (relative to the stars we can see from our home planet).

What Are Days and Nights Like on the Moon? | HowStuffWorks

Besides the 2019 Chinese rover Yutu-2, the only artificial objects on the Moon that are still in use are the retroreflectors for the lunar laser ranging experiments left there by the Apollo 11, 14, and 15 astronauts, and by the Soviet Union's Lunokhod 1 and Lunokhod 2 missions.

List of artificial objects on the Moon - Wikipedia

Directed by Joe Dante, Carl Gottlieb, Peter Horton. With Rosanna Arquette, Michelle Pfeiffer, Arsenio Hall, Donald F. Muhich. A spoof 1950s science fiction movie, interspersed with various comedy sketches concerning late night television.

Amazon Women on the Moon (1987) - IMDb

The moon rotates on its axis in about 27 days. Daytime on one side of the moon lasts about 13 and a half days, followed by 13 and a half nights of darkness. When sunlight hits the moon's surface,...

On the Moon Lyrics. [Verse 1] Been so damn faded lately, don't know if it's day or night. Ain't coming back to Earth alone, don't wanna waste the high. [Pre-Chorus] We on a freefall, on and on ...

Adam Lambert - On the Moon Lyrics | Genius Lyrics

A person would weigh much less on the Moon. The Moon has much weaker gravity than Earth, due to its smaller mass, so you would weigh about one sixth (16.5%) of your weight on Earth. This is why the lunar astronauts could leap and bound so high in the air. The Moon has only been walked on by 12 people; all American men.

Moon Facts - Interesting Facts about the Earth's Moon

When we look up at the Moon, we always see the same side. This peculiarity results because the Moon rotates just once for every orbit it makes around the Earth. The Moon is slightly lopsided, so over millions of years, gravitational forces have slowed its rotation so that the one side always faces our planet.

What's on the Far Side of the Moon? - LiveAbout

During the landing on the lunar surface in April 1972, astronauts from Apollo 16 filmed a strange object from their command module, this strange object appeared on the moon and remained visible for about 4 seconds, the astronauts described the object as a Plate species with a dome on it, extremely similar to the various sightings that will take place in the future, only in 2004 NASA tried to explain that it could only be a reflection of strange light, but in very few are convinced.

NASA | Tour of the Moon - YouTube

During a new moon, the Moon lies between Earth and the Sun. So, the side we normally see from here on Earth that's normally lit by the Sun is in its shadow. Only when the Moon is opposite from the Sun do we see that part of the surface lit up. At that point, the far side is shadowed and is truly dark.

What's Really on the Far Side of the Moon

The Moon is Earth's largest natural satellite, and we usually see it in the night sky. Some other planets also have moons or natural satellites. Our moon is about a quarter the size of the Earth. Because it is far away it looks small, about half a degree wide. The gravity on the moon is one-sixth of the Earth's gravity. It means that something will be one-sixth as heavy on the Moon than on Earth. The Moon is a rocky and dusty place. The Moon moves slowly away from the earth at a rate of 3.8 cm p

Moon - Simple English Wikipedia, the free encyclopedia

Peter's first cd was a great start, but this one shows his growth, both vocally and as a musician, and forms a much better showcase for his enormous talents. 'On The Moon' is an apt title, since the sky's the limit for this rising star!
