toilet. Put a few drops of food coloring or a dye tablet into the tank.

## **4 Ways to Troubleshoot Low Water Pressure - wikiHow**

This problem develops over decades, so the reduction in water flow is very gradual; you will not notice a sudden drop in pressure. However, if you move into an old house with steel pipes, the pipes may have significant corrosion to start with and the problem may worsen relatively quickly.

## **Common Causes of Low Water Pressure**

Anyhow, the amount of water that goes through the pipe is regulated by the valve, and there could be a sudden drop in water pressure since the valve might loosen up too much. After a couple of minutes, the pressure will get back at the normal level just because the valve will regulate the water flow properly once again.
